ENVAYA

PORTABLE BLUETOOTH SPEAKER

DENON®

PORTABLE PREMIUM SOUND FOR YOUR MOBILE DEVICE

For sensational sound on-the-go, the Denon Envaya™ Portable Bluetooth Speaker features the latest performance advances for listening to music, watching movies, video, TV, or gaming on Bluetooth mobile devices.

The sleek, highly compact, simple to use portable speaker system boasts best-in-class performance features, including the latest Bluetooth® aptX® Low Latency CD quality wireless streaming technology, NFC 'pairing', and extraordinary sound reproduction capabilities, far beyond its compact size.

The Italian inspired design sports a large aesthetically formed metallic speaker grill, detachable to allow personalisation of the colour scheme by swapping the four included interchangeable colour grill fabrics. The Envaya's form factor is truly portable. A single-handed squeeze action releases an integral kick-stand with rubber footer, for stable positioning. After use just grab and squeeze the speaker to close, pickup and go. Operation is amazingly simple via the intuitive tactile buttons along the top of the speaker: power on/off, Aux and Bluetooth select, concave / convex volume + / –, and speaker mute, LED battery indicator and NFC tap sensor.

An Aux input connects any non-Bluetooth audio device with an analogue audio output, and an USB port charges mobile devices. The battery provides 10 hours operation on a single charge. The included 100-240V power adapter includes selection of region plugs for use throughout the world. An optional carrying bag protects the Envaya and stores your accessories on the move.

CD Quality Streaming

Bluetooth® aptX® Low Latency audio streaming makes the Envaya ideal for listening to music, watching films, TV or video, or for gaming. aptX® is a higher quality Bluetooth streaming format, providing CD quality streaming – as if you were connected to the speaker with an audio cable (most Bluetooth speaker systems employ standard Bluetooth streaming). Additionally, the latest aptX® Low Latency streaming provides CD quality with a total end-to-end latency of just 32 milliseconds (ms); far less than the standard Bluetooth latency of than 150 ms (+/-50ms). This effectively eliminates the usual sound to picture time delay anomalies, like 'lip-sync' issues, inherent with standard Bluetooth streaming.

Simple Wireless Connectivity

NFC pairing lets the user tap any NFC enabled Bluetooth audio device, for automatic pairing with no button pressing. Multipoint functionality enables up to three devices to pair simultaneously with the Envaya, to enable sharing music among friends; the speaker plays one audio stream at a time, switching to another one when the current user pauses their music.

Extraordinary Sound Reproduction

Sound reproduction is far in advance of a normal compact speaker. Dual 'oversized' custom developed drivers are paired with a large passive bass radiator. Performance is tuned with a suite of five advanced on-board patented signal processing technologies that 'intelligently' provide the best possible sound performance from any connected signal source:

- **MaxxBass®** processing creates a virtual sub-woofer, reproducing a deep natural sounding low end extension, up to 1.5 octaves below the actual physical capability of the drivers.
- **MaxxTreble™** enhances and extends high-frequency detail and clarity, for crisp breathtaking reproduction of digital music files, video, TV, movie and gaming soundtracks.
- **Maxx3D™** generates a widened 3D image to produce a spacious soundstage with music, movie and gaming soundtracks, even from a small portable speaker.

Includes 4 Interchangeable Grille Cloth Covers:

KEY FEATURES

- Connects to all your Bluetooth devices
- Premium Sound from the Hi-Fi specialist
- Charges your mobile device on the go
- Grab-n-go with 10-hour rechargeable battery
- Includes 4 Interchangeable Grille Cloth Covers
- Optional carrying bag: protect your DSB200 while taking it along and store your accessories along
